

Forensic¹ Report

Case number **JZ 9421**² Orlando

- The window on the right-hand side in the **backyard**³ of the house was **shattered**⁴ and pieces of glass were identified inside the residence.
- The **windowsill**⁵ was forcefully bent out of place, **likely**⁶ causing the glass to shatter and indicating a high likelihood of **unlawful entry**⁷.
- Portions of the shattered glass were carefully removed and **placed**⁸ on the ground outside, again adding to the probability that the window was intentionally broken **in order to**⁹ gain ingress to the residence.
- The glass fragments that were left outside of the residence were taken into the mobile CSI unit and **meticulously**¹⁰ **dusted**¹¹ for fingerprints. At least two **sets**¹² of prints were found, one partial and the other complete enough for a positive identification of one **suspect**¹³ with 98% probability. The analysis of the **ridges**¹⁴ and whorls of the **fingerprint**¹⁵ allows for this team **to state**¹⁶, with almost complete certainty, that the **alleged**¹⁷ perpetrator did in fact touch the glass shard with his hand, and so was, on at least one occasion present at the address **in question**¹⁸.
- After examining the residence, several other sets of fingerprints **were found**¹⁹, including a **partial**²⁰ set representing a **42%**²¹ match with the fingerprints of the alleged **accomplice**²², Mauricio Diaz. This **evidence**²³ is

not conclusive, but raises the likelihood²⁴ that Mr. Diaz was present at the alleged break-in²⁵.
